

## What is Clean & Green?

Clean & Green is a program that was put together by Eden Scapes with the intention of keeping lawns and flower beds fertilized and free from weeds, insects & diseases.

Clean & Green Lawn: This service includes 6-7 applications per year, and is based off of how many square feet of Lawn is present on a property. Each year, each property will receive at least 3 Post-emergent herbicide applications, 2 Pre-emergent herbicide applications, 3 insecticide applications, and 3 applications of a custom blend of fertilizers and nutrients. Because fungicide has a significantly higher cost than the products mentioned above, and because it is not predictable as to when it will be needed, it is not included in our program. However, once it has been observed that fungus is starting to attack lawns in our area, you will be sent a notification with an offer for this service.

Clean & Green Beds: This service includes 3-4 applications per year of 3 different products, and is based off of how many square feet of flower bed is present on a property. Each year, all flower beds will be on a regular fertilizer program and will receive 3 timed applications of Pre-emergent herbicide, and plants that are prone to insect infestations will receive 3 timed applications of Systemic Insecticide.

## Clean & Green Pricing Structure:

Clean & Green can be paid for with any of the 3 following pricing structures based off of the customer's preference:

- Pre-pay for an entire year
- Pay an averaged monthly price for 12 months for 1 year of service
- Pay per application at time of service

We have found that different customers have different preferences, usually one of the methods mentioned above, so we try to accommodate whichever works best for each customer.

## Invoicing Process:

Invoices are sent out every Wednesday, and credit cards are run every Friday. For customers that have additional services that are billed at the end of each month, this service will be added to the monthly Invoice, which will be sent out the Wednesday following the last day of the month. For customers that only have the Clean & Green service, Invoices will be sent out the next Wednesday following the service.

## Payment Terms:

All monthly contracts are required to have a credit card # on file, and your card is automatically billed the Friday following the Wednesday that the Invoice is sent out, requiring no effort on your part to get your bill paid each month. The prices will have already been agreed upon, so there will never be any unexpected charges to your account. Should there be any additional services or products that were done in addition to the original contract, all customers will have 48 hrs to inquire about the charges from when the Invoice is sent on Wednesday, until the account is charged on Friday. Our credit card billing process is PCI compliant, and no one in our office ever sees your credit card #, so you never have to worry about your personal info being safe in our office. Upon acceptance of this Quote, you will be sent a separate email and prompted to enter your credit card info.

## Schedule:

These services require a delicate schedule and must be timed properly based off of life cycles of weeds and insects, current rainfall and temperatures, and time intervals between previous applications. Therefore, flexibility is required with this service and the schedule has to be kept fluid and constantly adjusted. We do send out emails notifying you the day before your service, a follow-up email if a change ends up having to be made, then a notification email to let you know that the service has been performed. Unfortunately, we cannot accept requests for service on specific days at this time, unless your job is exceptionally large (shopping centers, industrial & apartment complexes, etc.).
